USE CASE DOCUMENTATION

Project: ProfileBook – Social Networking Platform

Date: March 16, 2026

Table of Contents

UC-01: User Registration
UC-02: User/Admin Login
UC-03: Create & Submit Post
UC-04: Approve/Reject Post (Admin)
UC-05: Private Messaging
UC-06: Join & Interact in Groups
UC-07: User Management (Admin CRUD)
UC-08: Report Inappropriate Content

UC-01: User Registration

Use Case ID	UC-01
Use Case Name	User Registration
Actors	Guest User
Description	Allows a new user to create a profile by providing credentials.
Pre-conditions	User must not be logged in.
Post-conditions	A new user record is created in the database with hashed password.

Main Flow

Step	Action Description
1	User navigates to the Registration page.
2	User enters Username, Email, and Password.
3	User clicks the "Register" button.
4	System validates inputs (no empty fields, valid email format).
5	System checks if the username already exists in the database.
6	System hashes the password using HMACSHA512.
7	System redirects user to the Login page with a success message.

UC-02: User/Admin Login

Use Case ID	UC-02
Use Case Name	User/Admin Login
Actors	User, Administrator
Description	Authenticates users and provides access to either User or Admin Dashboard.
Pre-conditions	User must have a registered account.
Post-conditions	JWT token is stored in local storage; User redirected based on Role.

Main Flow

Step	Action Description
1	User enters Username and Password on the Login page.
2	System verifies credentials against the database.
3	System generates a JWT token containing User ID, Username, and Role.
4	System returns the token and user role to the frontend.
5	If Role is "Admin", redirect to Admin Dashboard.
6	If Role is "User", redirect to User Feed.

UC-03: Create & Submit Post

Use Case ID	UC-03
Use Case Name	Create & Submit Post
Actors	Registered User
Description	Allows users to create content which is then queued for admin approval.
Pre-conditions	User must be logged in.
Post-conditions	Post is created with status "Pending".

Main Flow

Step	Action Description
1	User goes to the Feed section.
2	User enters text content in the post box.
3	User clicks "Post".
4	System saves the post in the database with `Status = 'Pending'`.
5	User receives notification that post is awaiting approval.

UC-04: Approve/Reject Post (Admin)

Use Case ID	UC-04
Use Case Name	Approve/Reject Post (Post Moderation)
Actors	Administrator
Description	Admin reviews pending posts to maintain community standards.
Pre-conditions	Admin must be logged in; Pending posts must exist.
Post-conditions	Post status updated to "Approved" or "Rejected".

Main Flow

Step	Action Description
1	Admin navigates to the "Post Approvals" page.
2	System displays a list of all posts with "Pending" status.

3	Admin reviews the content and clicks "Approve" or "Reject".
4	System updates the record in the database.
5	Approved posts become visible in all users' feeds.

UC-05: Private Messaging

Use Case ID	UC-05
Use Case Name	Private Messaging
Actors	Registered User
Description	Allows real-time or stored communication between two users.
Pre-conditions	Both users must have accounts; Sender must be logged in.
Post-conditions	Message is stored and displayed in chat history.

Main Flow

Step	Action Description
1	User navigates to the "Messages" page.
2	User selects a recipient from their list or searches for a user.
3	User types a message and clicks "Send".
4	System saves the message with sender/receiver IDs and Timestamp.
5	Message appears instantly in the chat window.

UC-06: Join & Interact in Groups

Use Case ID	UC-06
Use Case Name	Join & Interact in Groups
Actors	Registered User
Description	Users can discover, join, and post content within specific interest groups.
Pre-conditions	User must be logged in.
Post-conditions	User becomes a member of the group; can view group-specific feed.

Main Flow

Step	Action Description
1	User navigates to the "Groups" page.
2	User clicks "Join" on an available group.
3	System adds user to the GroupMembers table.
4	User can now see posts shared specifically within that group.

UC-07: User Management (Admin CRUD)

Use Case ID	UC-07
Use Case Name	User Management
Actors	Administrator
Description	Admin can create, view, or delete users to manage the platform.

Pre-conditions	Admin must be logged in.
Post-conditions	User records updated/deleted as per admin action.

Main Flow

Step	Action Description
1	Admin navigates to "User Management".
2	Admin views a table of all registered users.
3	Admin can click "Add User" to manually register someone.
4	Admin can click "Delete" to remove a user (and their posts).
5	System updates the database and refreshes the user list.

UC-08: Report Inappropriate Content

Use Case ID	UC-08
Use Case Name	Report Inappropriate Content
Actors	Registered User, Administrator
Description	Users can flag posts/users for review, and Admins can act on reports.
Pre-conditions	User must be logged in.
Post-conditions	Report record created; Admin can view in "Reported Users" panel.

Main Flow

Step	Action Description
1	User identifies a post that violates terms.
2	User clicks "Report".
3	System creates a record in the Reports table with Reason and Target.
4	Admin views reports in the "Reports" dashboard.
5	Admin takes action (Warning or Account Deletion).
